Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment

HOW DID THE FUND PERFORM LAST YEAR AND WHAT AFFECTED ITS PERFORMANCE?

The Fund (C share class) finished the year in positive territory, up +10.34%, narrowly underperforming the Morningstar Long/Short Fund category which closed up +11.52%. The Fund's long book was a positive contributor in 2024 capitalizing on a variety of individual stocks spanning sectors and market capitalizations. With markets at all-time highs, a new administration, and geopolitical tensions rising, we believe the Fund remains in a unique position to tactically shift positioning and protect should a market correction emerge, along with the ability to profit, should this runaway market continue.

HOW DID THE FUND PERFORM OVER THE PAST 10 YEARS?*

The \$10,000 chart reflects a hypothetical \$10,000 investment in the class of shares noted and assumes the maximum sales charge. The chart uses total return NAV performance and assumes reinvestment of dividends and capital gains. Fund expenses, including 12b-1 fees, management fees and other expenses were deducted.
